I CERTIFY THAT, **NOVEMBER 25, 2009**, THIS PAPER IS BEING  
TRANSMITTED TO THE U.S. PATENT AND TRADEMARK OFFICE  
VIA THE OFFICE'S EFS WEB

  
PAUL L. WEAVER

**Supplemental Amendment**

Dear Madam:

This second communication is responsive to the Office's Notice to Comply with Requirements for Patent Applications Containing Nucleotide sequence and/or Amino Acid Sequence Disclosures mailed to the Applicants on August 12, 2009. No fee is believed to be due with the filing of this second communication.

Applicants' first communication, which included an amendment to the specification to include sequence identifiers, a sequence listing, a statement under 37 CFR 1.821, and an electronic copy of the sequence listing, was filed on October 13, 2009, within the proper period of reply extended one month. Upon review by the Office, the computer readable form (CRF) was determined to be defective. The notice was posted on PAIR (October 27, 2009), but a notice was not mailed to the Applicants.

The Examiner contacted the Applicants on November 18, 2009, informing of the non-entry of the CRF of the Sequence Listing. On November 19, 2009, Applicants discussed the defect in the CRF with the Science and Technology Center.

In this second communication a revised CRF and sequence listing are resubmitted, which are asserted to correct for the defect in the sequence listing filed October 13, 2009. Entry of the revised CRF and sequence listing is respectfully requested.
